

Elevator Interior Design

Standard Designs

Standard Design

Standard does not mean ordinary. We have chosen a great palette of options that will meet most needs. This option provides a flat laminate finish, white drop ceiling with can lights, stainless steel hand rails and white enamel doors and frames.

The elevator control station and hall calls are the Innovation standard model with brushed stainless steel, standard push buttons and all required emergency controls and communication devices.

Common upgrades available:

- Brass or bronze handrails*
- Brass or bronze control station & hall calls*
- Stainless steel doors and frames*
- Stainless steel ceiling with can lights*
- Other laminate color not listed*

Of course our helpful and friendly team will help you choose any interior finish you desire. Just let us know.

Additional Information

Ceiling Styles

Elevator ceilings have two prominent styles at this time. A drop polycarbonate ceiling with LED strips illuminating the panels or LED can lighting. With our elevators the polycarbonate drop ceiling is our standard and the LED can lights are an upgrade. You can also choose to upgrade to any variety of color and other lighting can be provided at request.

Polycarbonate Drop Ceiling
LED Light Strips - Standard

Aluminum Ceiling Panels
LED Can Lights - Upgrade

Custom Cabs from Suppliers

We feel that our cabs are superior in every way to loud metal cars. Our wood-core cars are quieter and require less maintenance over the life of the elevator. However, some of our customers like the products offered by Snap Cab, Concept or Schumacher. We can provide cabs from any of those or more. Please contact us for pricing and compare.

Suppliers Contact Information
